

ATTACHMENT DRUMS

REPLACEMENT DRUMS FOR ALL OEM MILLING ATTACHMENTS

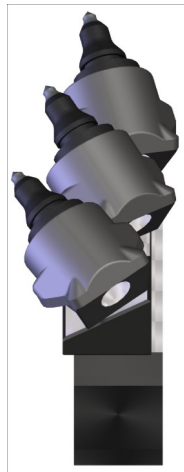

Easy Screw Quick-Change System for Skid Steer Milling Attachments

- Utilizes Keystone's proven attack and skew tool angles which allows the drum to cut more efficiently and drastically reduces tool consumption
- Machined and balanced shell minimizes vibration on the attachment
- Precise end ring placement with "The Edge" reduces wear on the blocks and leaves a clean edge cut
- Tooled with Keystone's patented Easy Screw Quick-Change System to eliminate the need for in-field welding
- Easy insert removal-unscrew holder with standard tools, no hydraulic presses or special tools required
- Taper on taper design provides a consistent holder locking depth, providing a uniform milled surface

Easy Screw QC System

"The Edge" end ring design
