

MARKING REMOVAL

REPLACEMENT DRUMS FOR ALL GRINDING MACHINES

Easy Screw Insert for
Standard Carbide Milling
Tools

Standard Carbide
Tool and Insert

D-540 Diamond Tool

- Interchangeable insert allows operators to easily change from carbide tools to PCD diamond tools
- Decrease downtime by eliminating all in-field welding on the drum
- Increase production while leaving a smoother and cleaner surface pattern
- Utilizes Keystone's proven attack angles for grinding machines, improving cutting efficiency and decreasing fuel consumption
- Replace inserts easily, unscrew insert with standard tools, no special tools required
- Taper on taper design ensures a consistent insert locking depth, providing a smooth and uniform surface pattern
